## SKILLS

### FRONT END BACK END

Javascript, Node.js, HTML, CSS, LESS, React, Redux, Bootstrap, React-Strap, Axios  
Express.js, MongoDB, Mongoose, mLab, SQL, Knex.js, Express-Session.js, JWT, Bcrypt

## PROJECTS

Mar. 2019 to Current

### LearnLocker

An app designed to keep track of courses and articles in one place and see what other users are learning.

React | Redux | Grommit | Styled Components | Express.js | Node.js | Postgres | Knex.js

- Executed within 6 weeks, on a team of 4 web developers.
- Utilized OAuth integration for full user authentication.
- URL metadata parsing for populating title, description and image.
- Used Udemy and Free Code Camp's API to retrieve data.
- CRUD routes on server all functional.
- Set up async data handling on the client.
- <http://learnlocker.dev>

Feb. 2019 to Current

### Slay All Day

An app where users can search through makeup products across purchasing sites, all in one place.

React | React Router | CSS grid | Material UI

- Users can search through makeup products by name and filter by product type.
- Users can click directly to product websites to make purchases.
- <https://sumi-makeup.netlify.com/>

July 2018 to Aug. 2018

### Lambda Notes

An app that allows a user to create, update and delete their notes.

React | React Router | CSS grid | Styled Components | Express.js | Node.js | SQLite | Knex.js

- Delivered a front end JavaScript application with self-contained, reusable, and testable components.
- Used React Router and can view, post, update, delete notes working with server.
- Data persistence with SQLite hosted on Heroku.
- <https://sumi-notes.netlify.com/>

## EXPERIENCE
